

SAPI taker buy flow upload one-time payment link

Step 1: Query payment method API to get all fields need upload

Sample payload:

GET

{{sapi_url}}/sapi/v1/c2c/paymentMethod/getTradeMethodDetail?identifier=p2plusQR×tamp={{timestamp}}&signature={{signature}}

Request parameter:

identifier=p2plusQRU (Get identifier from Binance after payment method creation)

Sample response:

```
{
  "code": "000000",
  "message": "success",
  "data": {
    "id": 119,
    "identifier": "p2plusQRU",

        "sequence": 4,
        "status": 1
    }
]
},
"success": true
}

```

Step 2: Upload one-time payment link using SAPI endpoint

Sample payload:

POST

```

{{sapi_url}}/sapi/v1/c2c/orderMatch/uploadOrderPaymentMethod?timestamp={{timestamp}}&signature={{signature}}

```

Request parameter:

```

{
    "orderNo": 22702897484775583744, // Your order number
    "tradeMethodIdentifier": "p2plusQRU", // Identifier from Binance
    "fieldList": [
        {
            "id": "90", // Field ID from API sapi/v1/c2c/paymentMethod, fieldList.id
            "fieldValue":
                "https://static.qa1fdg.net/client_upload/c2c/chat/20241218/143d355636dc49f4b3ab1ee4f012cb9e_20241218094310.jpg" // Input one time text, or one time S3 url link, or one time payment link
        },
        {
            "id": "93",

```

```
"fieldValue":{"name":"test2","androidUrl":"https://www.google.com","iosUrl":  
:"https://www.google.com","webUrl":"https://www.google.com"} // Use json format, "name" is  
button name, "androidUrl"/"iosUrl"/"webUrl" can be uploaded using different value
```

```
    }  
  ]  
}
```

Notes:

1. Please do not mix p2plus payment method with normal payment methods in a single ad
2. Please do not add the same p2plus payment method multiple times in a single ad
3. For 1 order, you can only upload payment details/links once
4. Taker buyer will still have mark as paid button, but merchant can use SAPI to release the order using fund password directly
5. Applicable to SELL adv only
